

RackStacker

The RackStacker eliminates manual lifting and loading of 3 and 5 gallon bottles, significantly improving employee safety and increasing production efficiency. Designed and built with a proprietary alignment system, the RackStacker's accuracy and reliability are unmatched. This highly efficient machine is easy to use, compatible with most rack styles, and easily integrates into your current production line. The system can be set up to convey filled and capped bottles from your production line directly to the RackStacker for quick loading on delivery trucks or moved to short term storage.

RackStacker
